Dear Brian:

RE: Radium King
ACT-037-007

We concur with the following revisions of the reclamation plan
for the Radium King East and West Channel Mines:

1. The 4 lbs. per acre Smooth Brome grass portion of the seed mixture will be replaced with 2 lbs. per acre Russian Wildrye grass and 1 lbs. per acre Indian Ricegrass.
2. Scarification and other desirable soil treatment techniques developed in revegetation test plots will be employed during reclamation.

Thank you for your assistance.

Sincerely,

Brad Clark

Brad Clark
